Phone No. 48-8270
or 48-8227

THE WHIPSTICK AREA

The Whipstick is a forest area north of Bendigo covering about ten square miles and abounding in native birds, animals and flowers.

The early history of the area was closely tied to gold with diggers rushing to the latest strikes in the dense Mallee scrub. The life was hard, tragedy was common while robbery and holdups were frequent in the lonely bush.

It wasn't long before some of the miners were looking for another means of earning a living. Mallee scrub abounded and was found to be rich in Eucalyptus oil so in the early 1860's the first distillery was set up.

In 1890 Matthew Jesse Hodgson and Albert Arthur Hartland moved into the area, built a eucalyptus factory and started to farm the Mallee scrub. This factory is still being operated by the present owner Mr. O. W. Hartland.

The industry has not been without its ups and downs, fluctuations in the price paid for the oil have often made it uneconomical to run the factory and since the Second World War the local product has been forced into keen competition with cheaply produced overseas oils, but still the industry continues to struggle on. Main uses for the oil now are in the manufacture of medicines, disinfectants, detergents, cosmetics and confectionery.

At the Whipstick Farm you will be able to see the distillery and machinery used in the production of eucalyptus oil, the old hut built by the founders and still containing the original furniture and also many other historical relics of the early settlers in this area.

**Buy the Blue Mallee Medicinal Oil—a non
staining natural product unique to Australia**

USES OF EUCALYPTUS OIL

(Remember our Eucalyptus Oil is non staining with the Pleasant natural smell.)

CHEST RUB: Rub Eucalyptus straight on to chest or break down with Olive Oil for younger children.

HEAD COLD: A few drops of Eucalyptus in a dish of hot water and inhale. A towel over the head will ensure that the vapours are not wasted.

A few drops on your pillow at night will clear your head and ensure a better sleep.

MUSCULAR ACHES & PAINS: Equal parts of Eucalyptus & Brandy is a very effective rub down (The brandy opens the pores of the skin to allow the eucalyptus to penetrate in).

SPOT REMOVING: Carpets & clothes:— Wet clean cotton rag and rub soiled spot for effective results. Particularly good for removing grease.

DISINFECTANT: A mixture of half & half of Eucalyptus & Methylated Spirits is a very effective disinfectant for cuts and grazes before bandaging.

DEODORANT: A few drops sprinkled about the room will keep it fresh & sweet.

REMOVES: Tar off the car without removing the duco.

Chewing gum from children's hair etc.

Black marks from vinyl shoes and handbags, vinyl floors etc.

Excess glue when doing home tiling.

PENETRATING OIL: Eucalyptus Oil is the most successful penetrating oil available. For all seized and rusted parts, pour on to affected parts.

Two tablespoons of Eucalyptus Oil in the radiator of the car twice a year keeps it clean and free of rust.

WASHING FLUID: (A very popular washing mixture).

Put into a container, $\frac{1}{2}$ packet of Lux Flakes or Softly etc.

(any good soap powder), $\frac{1}{2}$ cup of Methylated Spirits.

Leave overnight, then add 1 tablespoon of "Hartlands"

Eucalyptus Oil. Keep lid sealed well.

FOR USE IN WASHING MACHINES: Just add 1 tablespoon of the mixture for every 2 gallons of water. Excellent for greasy overalls etc.

FOR WASHING WOOLLENS: Use Washing Fluid just as you would use your normal washing powder.

Squeeze woollens through, DO NOT RUB and DO NOT RINSE. Roll woollens in a towel to get the excess water from them. Really keeps your blankets and woollen jumpers etc. looking very nice.

Blue Mallee Eucalyptus Oil can be purchased from our Distillery at Huntly North anytime at very reasonable prices. We also send the Eucalyptus Oil in 4 litre tins only per passenger rail, Freight forward to the railway station of your choice. (Cheque must be forwarded to us first).
